

Infection Prevention

UNOTRON Washable Keyboards & Mice

Halting the spread of infection one keyboard and mouse at a time!

Unotron's Spill Seal technology enables washable keyboards and mice to be easily cleaned and disinfected to prevent cross-contamination from one user to the next.

Features:

- Withstands repeated washing and disinfection without compromising functionality – easy to clean and disinfect with hospital-grade cleaners.
- Ergonomically designed.
- PC and Mac plug-and-play compatible.
- Rugged design.
- Corded or wireless keyboards and mice.
- Affordably priced.
